

Yingjie Yang is a professor at De Montfort University, Faculty of Computing, Media and Engineering, UK. He is also the deputy director of the Institute of Artificial Intelligence.

His **professional backgrounds** include research and teaching at Beijing Jiaotong University (1994-1999), Nottingham Trent University (1999), Loughborough University (1999-2002) and De Montfort University (2002-present).

In **his professional work**, he had led or attended a number of research projects supported by European Commission, Royal Society, Leverhulme Trust, European Space Agency and EPSRC. In his latest Leverhulme trust project, he had coordinated an international network involving 7 partners from 5 different countries. His teaching covers a wide range of modules in information systems.

In **his research work**, he is focusing on the significance of uncertainties in systems and cybernetics, so as to provide better methodologies in the identification, quantification and measurement of uncertainties for system analysis.

He is passionately involved in activities in various professional bodies. He is serving as the deputy president of the International Association of Grey Systems and Uncertainty Analysis, a co-chair for IEEE Technical Committee of grey Systems, a senior member in IEEE Society for System, Machine and Cybernetics, and a PC member for over 100 international academic conferences.

He has published over 160 academic publications covering grey systems, fuzzy sets, rough sets, neural networks and their applications to civil engineering, environmental control, condition monitoring, economics and management. He is serving as associated editor for 4 international academic journals, among them including IEEE Transaction on Cybernetics,
