

Roberto Moreno-Diaz is an assistant Professor and Senior Lecturer at the University of Las Palmas de Gran Canaria, Faculty of Computer Science, in Spain. He is also a member of the Research Institute for Cybernetics at the same University.

His **professional background** includes high management-rank public positions in the Canary Islands region as Island Minister for Tourism and Technological Innovation of Gran Canaria, CIO (Director General for Telecommunications and Technology) of the Canary Islands regional Government, Viceminister for Health of the Canary Islands Government and is currently member of the Executive Board of the Canary Islands Tax Agency.

In **his professional work**, he tries to combine his Systems Theory research interests, his experience in public management and government, and his teaching duties, thus in his last project, together with the University Foundation of Las Palmas, he trained several groups of recently graduate students on advanced practical tools and techniques for the digital transformation of institutions.

In **his research work**, he is connecting the development of systems thinking and cybernetics to practical, focused problems to provide value added in applications oriented to modelling and explaining tourism systemic behaviour in the Canary Islands.

He is passionately involved in music and in the history of computer science and cybernetics.

He is an author and/or editor of multiple professional and research publications in prestigious journals, among them Sensors (Basel), IEEE Access, Mathematical Biosciences and Engineering, Lecture Notes in Computer Science, Cybernetics and Systems, Biological Cybernetics etc.
